WHAT'S NEW...

Most people enjoy theme parks as a place to get away from work, but for those in the hydraulics industry, they are a place to demonstrate their expertise. Behind many of the rides that make your stomach drop or your eyes blink in amazement, accumulators are picking up the stresses and enhancing the performances of hydraulic technology. FEATURED...

GoatThroat fluid friendly pumps are the safest, most reliable, and easiest way to transfer any liquid accurately. Custom configured pumps, fitting and accessories are fluid specific, meet compatibility requirements, and are designed as complete turnkey solutions to fit your exact transfer application. At GoatThroat Pumps, there is no compromise in terms of performance, safety or sustainability. Our systems are specifically designed with that balance in mind by experts who understand your application. You don't have to choose between what is important for your business and what is good for your people.

HOW TO...

Crimpers are an essential part of any hose system. Your hose assembly would not be safe and effective without the proper crimp. Ensure the success of your hose assembly operation with Eaton's crimp machines and tooling. With the new Eaton-branded crimp machine portfolio, both Aeroquip™ and Weatherhead™ customers have access to the same crimp machines and tooling! This simplified and improved offering with lower cost options is comprised of positive stop and variable crimpers in portable, general service, and industrial production options to meet all your application needs.
